SUBJECT INDEX

Additives
  electrolyte, for Zn-anoded secondary cells; brighteners, levellers and complexants, 345
Alkaline batteries
  performance characteristics of electrochemically impregnated Ni oxide electrodes for, 409
Aluminium
  Li electrodes based upon Al and alloy substrates; impedance measurements on Al, 259
  performance of Ca/thionyl chloride cells containing $Sr(AlCl_4)_2$ electrolyte, 295
Antimony
  inhibition of hydrogen evolution by Sb contaminated Pb electrodes in sulfuric acid electrolyte, 381
Automotive battery manufacture
  manufacturing trends in, 155
Automotive lead/acid batteries
  future trends in, 11

Batteries
  alkaline, performance characteristics of electrochemically impregnated Ni oxide electrodes for, 409
  lead/acid
    development of sealed, for solar power systems, 173
    discharge characterisation of, 161
    effects of Bi on electrochemical performance, 69
    future trends in automotive, 11
    mechanisms by which organic expanders improve performance of, 149
    sealed, for portable underground lighting, 207
    sealed, for solar polar systems, 173
    stationary, for power sector in India, 201
    tubular-plate, for remote area energy storage, 187
  Li/BCX (bromine chloride in thionyl chloride), determination of heat capacities in, 269
Battery manufacture
  manufacturing trends in automotive, 155
Battery market update
  world starter and industrial; insider view, 23
Battery paste calculations
  computer model for, 127
Battery production
  lead/acid, technical and research aspects of, 217
Bismuth
  effects of, on electrochemical performance of lead/acid batteries, 69
Bromine
  H–Br fuel cell, simulation studies on performance of hydrogen electrode bonded to proton exchange membranes in, 301
Bromine chloride
  Li/BCX (bromine chloride in thionyl chloride) batteries, determination of heat capacities in, 269

Cadmium
  Ni–Ce cells, chemical impregantion and sinter corrosion in plaques for, 247
Calcium
  comparison of behavior of $Li/SOCl_2$ and $Ca/SOCl_2$ systems at elevated temperatures, 325
  /thionyl chloride cells containing $Sr(AlCl_4)_2$ electrolyte, performance of, 295
Calcium corrosion
  in thionyl chloride-based electrolytes, reduction of, 361
Cell(s)
  Ca/thionyl chloride, containing $Sr(AlCl_4)_2$ electrolyte, performance of, 295
  H–Br fuel, simulation studies on performance of hydrogen electrode bonded to proton exchange membranes in, 301
  Li–Na thiochromite all-solid-state high temperature secondary, 279

© Elsevier Sequoia/Printed in The Netherlands

Li, sol–gel route to composite positive electrodes for, with polymer electrolytes, 397
Ni–Cd, chemical impregnation and sinter corrosion in plaques for, 247
Zn-anoded secondary, electrolyte additives for; brighteners, levellers and complexants, 345
Chemical impregnation
and sinter corrosion in plaques for Ni–Cd cells, 247
China
lead/acid battery industry in, 37
Chloride Type 8 oxide mill
developments to, including computerised production control, 113
Cobalt
electroreduction of oxygen on some novel Co phthalocyanine complexes, 317
Computerised production control
developments to Chloride Type 8 oxide mill including, 113
Computer model
for battery paste calculations, 127
Corrosion
Ca, in thionyl chloride-based electrolytes, reduction of, 361
Li, effect of Na cation on, in aprotic media, 335

Discharge characterisation
of lead/acid batteries, 161

EGAT's experience
with storage batteries for photovoltaics, 181
Electrochemical performance
of lead/acid batteries, effects of Bi on, 69
Electrode(s)
hydrogen, simulation studies on performance of, bonded to proton exchange membranes in H–Br fuel cell, 301
Li, based upon Al and alloy substrates; impedance measurements on Al, 259
Ni oxide, performance characteristics of electrochemically impregnated, for alkaline batteries, 409
Pb, inhibition of hydrogen evolution by Sb contaminated, in sulfuric acid electrolyte, 381
PbO_2, influence of Sn on passivation of, 367
sol–gel route to composite positive, for Li cells with polymer electrolytes, 397
Electrolyte
polymer, sol–gel route to composite positive electrodes for Li cells with, 397
$Sr(AlCl_4)_2$, performance of Ca/thionyl chloride cells containing, 295
sulfuric acid, inhibition of hydrogen evolution by Sb contaminated Pb electrodes in, 381
thionyl chloride-based, reduction of Ca corrosion in, 361
Electrolyte additives
for Zn-anoded secondary cells; brighteners, levellers and complexants, 345
Electroreduction
of oxygen on some novel Co phthalocyanine complexes, 317
Energy storage
remote-area, tubular-plate lead/acid batteries for, 187
Europe
lead/acid battery industry in, 55
Expanded grids
resistance of, and high-rate plate performance; preliminary results, 93

Fuel cell
H–Br, simulation studies on performance of hydrogen electrode bonded to proton exchange membranes in, 301

Heat capacities
of Li/BCX (bromine chloride in thionyl chloride) batteries, determination of, 269
Hydrogen
–Br fuel cell, ssimulation studies on performance of hydrogen electrode bonded to proton exchange membranes in, 301
Hydrogen evolution
inhibition of, by Sb contaminated Pb electrodes in sulfuric acid electrolyte, 381

Impedance measurements
on Al; Li electrodes based upon Al and alloy substrates, 259
India
lead/acid stationary batteries for power sector in, 201

Lead/acid batteries
discharge characterisation of, 161
effects of Bi on electrochemical performance of, 69
future trends in automotive, 11
mechanisms by which organic expanders improve performance of, 149
sealed, for portable underground lighting, 207
for solar power systems, development of sealed, 173
stationary, for power sector in India, 201
tubular-plate, for remote-area energy storage, 187
Lead/acid battery industry
in China, 37
in Europe, 55
in Pakistan, 45
Lead/acid battery production
technical and research aspects of, 217
Lead dioxide electrode
influence of Sn on passivation of, 367
Lead electrodes
inhibition of hydrogen evolution by Sb contaminated, in sulfuric acid electrolyte, 381
Lead market, 3
Lead recycling technology, 85
Leady oxide
discussion on properties and manufacture of, 141
Leady oxide production
background aspects, 107
modern technology for, 121
Lithium
comparison of behavior of $Li/SOCl_2$ and $Ca/SOCl_2$ systems at elevated temperatures, 325
heat capacities of Li/BCX (bromine chloride in thionyl chloride) batteries, determination of, 269
–Na thichromite all-solid-state high temperature secondary cell, 279
Lithium cells
sol–gel route to composite positive electrodes for, with polymer electrolytes, 397
Lithium corrosion
effect of Na cation on, in aprotic media, 335
Lithium electrodes
based upon Al and alloy substrates; impedance measurements on Al, 259

Manufacture
of leady oxide, discussion on properties and, 141

Nickel
–Cd cells, chemical impregnation and sinter corrosion in plaques for, 247
Nickel oxide electrodes
performance characteristics of electrochemically impregnated, for alkaline batteries, 409

Organic expanders
mechanisms by which, improve performance of lead/acid batteries, 149
Oxygen
electroreduction of oxygen on some novel Co phthalocyanine complexes, 317

Pakistan
lead/acid battery industry in, 45
Passivation
of PbO_2 electrode, influence of tin on, 367
Performance
of Ca/thionyl chloride cells containing $Sr(AlCl_4)_2$ electrolyte, 295
of hydrogen electrode bonded to proton exchange membranes in H–Br fuel cell, simulation studies, 301
Performance characteristics
of electrochemically impregnated Ni oxide electrodes for alkaline batteries, 409
Photovoltaics
storage batteries for, EGAT's experience with, 181
Phthalocyanine complexes
Co, electroreduction of oxygen on some novel, 317
Plate performance
high-rate, resistance of expanded grids and; preliminary results, 93

Properties
of leady oxide, discussion on manufacture and, 141
Proton exchange membranes
in H–Br fuel cell, simulation studies on performance of hydrogen electrode bonded to, 301

Remote-area energy storage
tubular-plate lead/acid batteries for, 187
Resistance
of expanded grids and high-rate plate performance; preliminary results, 93

Simulation studies
on performance of hydrogen electrode bonded to proton exchange membranes in H–Br fuel cell, 301
Sinter corrosion
chemical impregnation and, in plaques for Ni–Cd cells, 247
Sodium cation
effect of, on Li corrosion in aprotic media, 335
Sodium thiochromite
Li–Na thiochromite all-solid state high temperature secondary cell, 279
Solar power systems
development of sealed lead/acid batteries for, 173
Sol–gel route
to composite positive electrodes for Li cells with polymer electrolytes, 397
Storage batteries
for photovoltaics, EGAT's experience with, 181
Strontium
performance of Ca/thionyl chloride cells containing $Sr(AlCl_4)_2$ electrolyte, 295
Sulfuric acid electrolyte
inhibition of hydrogen evolution by Sb contaminated Pb electrodes in, 381

Technical and research aspects
of lead/acid battery production, 217
Thionyl chloride
-based electrolytes, reduction of Ca corrosion in, 361
Ca/, cells containing $Sr(AlCl_4)_2$ electrolyte, performance of, 295
comparison of behavior of $Li/SOCl_2$ and $Ca/SOCl_2$ systems at elevated temperatures, 325
Tin
influence of, on passivation of PbO_2 electrode, 367

Underground lighting
sealed lead/acid batteries for portable, 207

Zinc
electrolyte additives for Zn-anoded secondary cells; brighteners, levellers and complexants, 345
